

实验六.txt
实验六， Spring2后通知

AfterAdviceDemo
|
|-----tarena
|
|-----spring-config.xml
加入Spring2Core包
加入Spring2AOP包

步骤一，
public interface IHello {
 public void hello(String name);
}

步骤二，
public class HelloSpeaker implements IHello {

 public void hello(String name) {
 System.out.println("你好， " + name);
 }

}

步骤三，
//日志切面
@Aspect
public class LogAspect {

 private Logger logger =
Logger.getLogger(this.getClass().getName());

 // 日志代码
 @Pointcut("execution(* tarena.IHello.*(..))")

实验六.txt

```
private void logger() {  
}  
  
@Before("logger()")  
public void before(JoinPoint joinPoint) {  
    System.out.println("日志开始");  
}  
}
```

步骤四，

//日志切面

@Aspect

public class LogAspect {

```
    private Logger logger =  
    Logger.getLogger(this.getClass().getName());
```

//日志代码

@Pointcut("execution(* tarena.IHello.*(..))")

private void logger(){}

@AfterReturning(pointcut="logger()")

public void afterReturning(JoinPoint joinPoint){

System.out.println("日志结束");
}

}

步骤五，

public class Test {

```
    public static void main(String[] args) {
```

```
        ApplicationContext context =
```

```
            new
```

实验六.txt

```
ClassPathXmlApplicationContext("tarena/spring-config.xml");
```

```
    IHello proxy =
```

```
(IHello)context.getBean("HelloSpeaker");
```

```
        proxy.hello("赵君");
```

```
    }
```

```
}
```

步骤六，
你好，赵君
日志结束
